33.6	Specifications.
35.0	For factors retained in <b>BDS</b> , pursuant to <b>ITB 33.5</b> one or more of the following quantification methods will be applied, as detailed in the <b>BDS</b> :
	(a) Inland transportation from EXW/port of entry/border point, Insurance and incidentals.
	Inland transportation, insurance, and other incidental costs for delivery of the goods from EXW/port of entry/border point to Project Site named in the BDS will be computed for each Bid by the PA on the basis of published tariffs by the rail or road transport agencies, insurance companies, and/or other appropriate sources. To facilitate such computation, Bidder shall furnish in its Bid the estimated dimensions and shipping weight and the approximate EXW or as per applicable INCOTERM value of each package. The above cost will be added by the NBP to EXW or as per applicable INCOTERM price.  (b) Delivery schedule.
	i) The NBP requires that the goods under the Invitation for Bids shall be delivered (shipped) at the time specified in the Schedule of Requirements. The estimated time of arrival of the goods at the Project Site will be calculated for each Bid after allowing for reasonable international and inland transportation time. Treating the Bid resulting in such time of arrival as the base, a delivery "adjustment" will be calculated for other Bids by applying a percentage, specified in the BDS, of the EXW or as per applicable INCOTERM price for each week of delay beyond the base, and this will be added to the Bid price for evaluation. No credit shall be given to early delivery.
	ii) The goods covered under this invitation are required to be delivered (shipped) within an acceptable range of weeks specified in the Schedule of Requirement. No credit will be given to earlier deliveries, and Bids offering delivery beyond this range will be treated as non-responsive. Within this acceptable range, an adjustment per week, as specified in the BDS, will be added for evaluation to the Bid price of Bids offering deliveries later than the earliest delivery period specified in the Schedule of Requirements.

Or

(iii) The goods covered under this invitation are required to be delivered (shipped) in partial shipments, as specified in the Schedule of Requirements. Bids offering deliveries earlier or later than the specified deliveries will be adjusted in the evaluation by adding to the Bid price a factor equal to a percentage, specified in the BDS, of EXW or as per applicable INCOTERM price per week of variation from the specified delivery schedule.

### (c) Deviation in payment schedule.

i) Bidders shall state their Bid price for the payment schedule outlined in the SCC. Bids will be evaluated on the basis of this base price. Bidders are, however, permitted to state an alternative payment schedule and indicate the reduction in Bid price they wish to offer for such alternative payment schedule. The NBP may consider the alternative payment schedule offered by the selected Bidder.

Or

ii) The **SCC** stipulates the payment schedule offered by the **NBP**. If a Bid deviates from the schedule and if such deviation is considered acceptable to the **NBP**, the Bid will be evaluated by calculating interest earned for any earlier payments involved in the terms outlined in the Bid as compared with those stipulated in this invitation, at the rate per annum specified in the **BDS**.

### (d) Cost of spare parts

i) The list of items and quantities of major assemblies, components, and selected spare parts, likely to be required during the initial period of operation specified in the BDS, is annexed to the Technical Specifications. The total cost of these items, at the unit prices quoted in each Bid, will be added to the Bid price.

Or

ii) The NBP will draw up a list of high-usage and high-value items of components and spare parts, along with estimated quantities of usage in the initial period of operation specified in the BDS. The total cost of these items and quantities will be computed from spare parts unit prices submitted by the Bidder and added to the Bid price.

0

iii) The **NBP** will estimate the cost of spare parts usage in the initial period of operation specified in the **BDS**, based on information furnished by each Bidder, as well as on past experience of the **NBP** or other **NBP**'s in similar situations. Such costs shall be added to the Bid price for evaluation.

### (e) Spare parts and after sales service facilities in Pakistan

The cost to the **NBP** of establishing the minimum service facilities and parts inventories, as outlined in the **BDS** or elsewhere in the Bidding Documents, if quoted separately, shall be added to the Bid price.

		(f) Quanting and maintanance and
		(f) Operating and maintenance costs
		Since the operating and maintenance costs of the goods under
		procurement form a major part of the life cycle cost of the equipment, these
		costs will be evaluated in accordance with the criteria specified in the <b>BDS</b>
		or in the Technical Specifications.
		(g) Performance and productivity of the equipment.
		Bidders shall state the guaranteed performance or efficiency in response
		to the Technical Specification. For each drop in the performance or
		efficiency below the norm of 100, an adjustment for an amount
		specified in the BDS will be added to the Bid Price, representing the
4.4		capitalized cost of additional operating costs over the life of the plant,
		using the methodology specified in the BDS or in the Technical
		Specifications.
		Or
		$\mathrm{ii})$ Goods offered shall have a minimum productivity specified under the
		relevant provision in the Technical Specifications to be considered
